# The MISSOURI MINER

NUMBER 27

VOLUME 45

ROLLA, MO., FRIDAY, MAY 1, 1959

## Jimmy Palmer and Petticoats Are General Lectures Feature

Jimmy Palmer was preparing for the entertainment world early in life in his native Pennsylvania. He was singing and dancing professionally at the age of six. After graduation from Cannonburg,

many performances in that area, learning how to win over audiences, and achieved poise and stage presence that puts him at ease with audiences. Later, he graduated from the famous Ned

dancer, after which he opened his own dancing school near Pittsburgh. Soon, with Jimmy's natural ability, this became one of the area's finest dancing studios.

Jimmy Palmer started his career by winning a Paul Whiteman "Youth of America" contest in Pittsburgh, and was soon taken up by several Pittsburgh radio stations as a result of this contest.

One day, while doing his sustaining show over Radio Station KDKA, he received a call from band leader Dick Stabile, who asked him to substitute for his vocalist who had suddenly become too ill to appear with the band. Luck was with Jimmy again, and what was to be just a temporary "fill-in" turned out to be a permanent job for him. He joined the Stabile band and went on the road with it. He was a great success and it wasn't long before the name "Jimmy Palmer" really began to grow. Jimmy has appeared as featured vocalist with such bands as Bobby Byrne, Lou Breeze, Les Brown and Blue Baron. While with the Les Brown Orchestra, he made several movies as vocalist with that band.

It took a musical merger of the House Sisters and The Hirth-Quakes to come up with the newest recording sensation in feminine threesomes, The Petticoats, one of the most exciting vocal trios to appear on the musical scene.

Bea and Mary House, two-thirds of the petticoated pretties, started their harmonizing as mere slips of girls, along with another sister, in a family trio. They virtually grew up in radio and TV in their native Louisville at WHAS-TV.

Over in Pittsburgh almost a duplicate of their career was being carved out by three sisters Hirth, with Margie, Daris and Carol becoming favorites in the Steel City, via radio and televi-

THE PETTICOATS — Margie, Bea and Mary

sion, as the Hirth-Quakes.

But marriage and home-making wreaked their toll in both groups, and soon Margie was carrying the Hirth banner alone, while Bea and Mary House ruefully packed their bags and decided to seek greener fields beyond Louisville, as a duo.

They found themselves in Pittsburgh, working at the same station with Margie Hirth. It was not long before the three were harmonizing for their own pleasure. They sounded so good that their co-workers urged them to join forces and work as a trio. They

Pennsylvania, High School, he attended Carnegie Tech in Pittsburgh, where he majored in that school's Dramatic Arts course. He appeared in several stock com-

Wayburn School of Dancing in New York, which boasts of many of today's recognized dancers. Jimmy went on to many successful engagements as a professional

## Phi Kappa Consolidates With Theta Kappa Phi

The climax of nearly a year's preparation will take place April 29, 1959, in the consolidation of two well known Catholic fraternities, Phi Kappa and Theta Kappa Phi. With this union a new fraternity will be formed and will appropriately be called Phi Kappa Theta. This union is properly called a consolidation, and is neither a merger nor absorption of either of the predecessor fraternities.

Phi Kappa Theta being the continuation of both Theta Kappa Phi and Phi Kappa, will date its founding to the founding of the elder of the uniting fraternities.

It will be known in their histories that Phi Kappa Theta was founded at Brown and Lehigh Universities, and that founders day is April 29, 1889.

Since both Theta Kappa Phi and Phi Kappa were Catholic fraternities, basically the same in organization, etc., the idea of consolidating was very sound.

The resulting benefits are obvious. It will join the old, in strength, size and capability of expanding and competing with other fraternal organizations. Approval of the consolidation was voted by both fraternities at separate conventions held last summer.

Charter day banquets will be held Wednesday, April 29, throughout the nation on 53 college campuses where the charter of Phi Kappa Theta will be presented to each chapter. On the Missouri School of Mines and Metallurgy campus in Rolla, MU chapter of Theta Kappa Phi has made extensive plans for the charter day celebration. All alumni members have been invited along with many honored guests from the school and town. The activities for the evening include a mass in St. Patrick's church, the banquet with the presentation of the charter, followed by the initiation ceremony.

## Petroleum Student Wins in Annual Paper Contest, April 10

Frank L. Ruppert was successful in winning second place in the annual paper contest for petroleum engineering students held at the University of Tulsa campus April 10th. The awards program and banquet was held in conjunction with the Tulsa Petroleum Branch, AIME, April meeting.

The contest, sponsored by the Mid-Continent Petroleum Engineering Branch of AIME, consisted of graduate and undergraduate papers selected from petroleum engineering schools in this area which are Tulsa University, Kansas University, Kansas State College, Oklahoma University,

Oklahoma State College, and the Missouri School of Mines.

Frank's presentation, titled, "A Preliminary Mathematical Analysis of the Methods Leading to the Effective Scaling of Petroleum Reservoir Models," represents an investigation of scaling coefficients useful in reducing petroleum reservoirs to workable size laboratory models. His trip to Tulsa was sponsored by the student petroleum section of AIME.

Frank is a senior petroleum engineering student expecting to receive his degree in June. He currently calls Hialeah, Florida, his home, graduating from Brooklyn Tech. High School in Brooklyn, N. Y.

flew with the Air Force to Jackson where they were met by a representative of the Waterways Experiment Station, who did everything but roll out the red carpet to make them welcome. (This included providing the group with dates.)

During the three-day trip, these future military men visited the sites of various working models of prominent bodies of United States waterways, which annually save the Corps of Engineers vast amounts of money by accurately predicting in advance just what will take place under natural and imposed conditions. There was also an interesting tour of the facilities on the base which are a part of the Corps of Engineers Research and Development program. An interesting side trip through the battlefield, which was the scene of so much bloodshed, made the tour complete.

The unit left Vicksburg behind with fond memories of true southern hospitality.

Anyone care to join? See your local S. A. M. E. recruiter.

## NOTICE

The honors convocation will be held on Thursday, May 7 at 3:30 p.m. in Parker Hall. All those concerned should try to attend and everyone is welcome.

## THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.00 per semester. This Missouri Miner features activities of the Students and Faculty of M.S.M.

## Dizzy's Corner

### FLASH!

Herman Cosnowski was found at long last, cemented into the wall of G-6. Ol' Herm', a day-laborer (lab. assistant), was last seen titrating a beer sample for Dr. Schunk to determine the free CO<sub>2</sub>, this was in 1947 when the Cram Engin building was built. He was identified by the 400 ml beaker clutched in his hand. Posthumously, he has been awarded credit in general chemistry, but he must make up the 119½ negative hours received for excessive cutting, before his diploma will be awarded.

The new student union shall be named after him—Cosnowski's Campus Club—his remains, the beaker and a copy of the 1947 bulletin will be placed in the cornerstone. Herm's absence was first noticed when his Spring '47 preregistration form was cleared this year.

The trouble with this rat-race we've gone through this week is, that so much time must be devoted to beating the Saturday class that by the end of the semester we've flunked six hours and have to start again, anyway. The basic steps to preregistration are a beautiful study in confusion. One must have: a great deal of patience, a bulletin which shows the suggested outline (deviously designed to make MSM into a 4 ½ year penal colony), an advisor who is convinced that 7:30 classes are the word this year and all students are taught better on Saturday morn.

Now that all the weeping and gnashing of teeth has been completed, all one has to do is face the stony-jawed crew at Parker Hall. In order to keep our temperatures below the boiling point, some far-sighted soul has placed sheets of plywood chastity in front of their legs. I'm curious as to whose unclean thoughts are being prevented. We engineers

are taught to consider the source.

The only way to keep your courses from being changed is to be the very first to register or the very last. By being last one can usually wait 'til September, and pick his sections for the best instruction and hours.

During this time each year our Ivy-League profs feel poorly as they are being out-dressed by the B.M.O.C.'s (Benevolent Mourners of Cosnowski) in their cool, cool, winter suits . . . the mark of the organization pledgeship. This subtle form of hazing, 5000 signatures on a postage-stamp-size key, offers a challenge to any able-bodied soul.

### Summer School Blanks

A survey is being made to determine the number of students who want to go to summer school this year and the courses in which they are interested.

If you want to go to summer school, it is important that you fill in the form below. Bring it to the Information Desk in the Registrar's Office as soon as possible.

Dept.	Course No.	Name of Course	Sem. Hours

## To the Editor:

I am in complete agreement with "Dorm Dwelling Independent." The Independent Student Council representatives do not represent the Independents. It is true that we can attend meetings and gain recognition, but we have no vote which is really what counts. The married students are another group with little or no representation. We pay the same percentage of our activities to student council as the voting club members. We should have as much control over Student Council as they do.

Married Student

*The question of representation in the Student Council deserves much more discussion than it has been given in these last two issues of the Miner. While the methods of the Boston Tea Party for gaining representation are rather crude, one can always fight for that which he believes.*

*Send your letter on the question of representation to the Miner as soon as possible.*  
The Editor

My spies report that a brand, spanking new honorary, Omicron Pi Sigma, has sprang up. Something more to join, oh, boy!

These honorary and social organizations are a very good thing (we are told), as it indicates to the prospective employer the sociability of you, the student. "H'm, you have been an officer in 17 of the organizations to which you belong. Commendable! Mmmm, C average, aye? Now our engineering department is in dire need of a good, sociable, blue printer, etc."

To wear a suit in the old days (I am told) indicated a man of

## To Award Foundry Scholarships

The Committee on the Foundry Educational Foundation Scholarships will meet in May to award scholarships for the coming fall semester. Any students wishing to be considered for these awards, please write a letter to the committee, c/o Department of Metallurgical Engineering, before May 7, 1959. This letter should contain complete information concerning the student's academic position as to curriculum, year, and grade point. In addition, the committee should be informed as to the work experience of the

applicant, and other general data concerning background, need, sources of funds for education, and all such matters that will assist in arriving at a decision. Also, please submit an Information Blank with your letter; these can be picked up at the Departments of Mechanical and Metallurgical Engineering or Assistant Dean Hubbard's Office.

These awards are made primarily to students in the Departments of Mechanical Engineering and Metallurgical Engineering, but they are open to any individual who is genuinely interested in foundry work, who will take at least one course in foundry instruction at this school, and who will consider the possibilities of working in the foundry industry.

## U. S. Civil Service Announcement Shows Need for Qualified Engineers

There is an urgent need for highly qualified applicants for the following positions, the United States Civil Service Commission announces: Electronic Scientist, Metallurgist, and Physicist, \$4,490 to \$11,595 a year; and Engineer, \$4,490 to \$12,770. The following types of engineers are needed: aeronautical, electrical, chemical, electronic, mechanical, general and industrial.

The positions to be filled are located at Huntsville, Alabama, with the Redstone Arsenal, which serves as headquarters for the Army Ordnance Missile Command, the Army Ballistic Missile Agency, the Army Rocket and Guided Missile Agency, and the Ordnance Guided Missile School. This organization is concerned with research, development, and industrial activities of rocket,

missile, and satellite programs, plus the support of missile systems in the field.

Applicants must have had appropriate education or experience or a combination of both. Applications will be accepted by the Board of U. S. Civil Service Examiners, Redstone Arsenal, Alabama, until further notice.

Detailed information about these positions is contained in Announcement No. 5-35-7(59) which may be obtained at the above address, at many post offices throughout the country, or from the U. S. Civil Service Commission, Washington 25, D. C.

## JIMMY PALMER AND PETTICOATS

(Continued from Page 1)

were an immediate sensation, and their Pittsburgh fans urged them on to the "big time."

One way to try, they figured, would be to get on a national talent show. So, off to New York they went, and the Arthur Godfrey Talents Scouts shows. Their Pittsburgh fans were right—the audience loved them and Arthur awarded them with a week's engagement on his show. This was it, they were on their way. They were signed for the headline spot at the Colony Club in Revere Beach, Massachusetts, which was followed by another engagement,

this time at the Town Casino in Buffalo.

RKO Teleradio signed them to an exclusive recording contract for their Unique label, where they cut their first tune, juts recently released, "The First One," backed by "The Motor Boat Song." Advance sales have offered them a spot in his touring show.

An interesting sidelight to the Petticoats is the origin of their name. When they first came to New York for the Godfrey Show, they went to a photographer to have their pictures taken. While waiting there, a gentleman interrupted, "Pardon me, girls, but your petticoats are showing." They thanked him and remarked that they always wore lots of petticoats and they often showed. The gentleman later became their personal manager and suggested that they take the name of the Petticoats, which they gladly did.

Many of us think we have "read" a magazine if we have read one article.

The only glassware we seem to break at my place is a product of Steuben, not the five-and-dime kind.

An executive would have to be either juvenile or senile who didn't know more than his secretary, but what can you do to convince her of that?

## Chem Eng. Senior Selected by BSU for Mission Work

Eldon Dille, senior in chemical engineering, has been selected from Baptist students throughout Missouri as a student summer missionary. Twelve students are selected each year, from colleges in Missouri, to do mission work during the summer months. They serve in different parts of the United States and in foreign countries. They receive no salary for this work. Their expenses are paid by donations from Baptist students in Missouri. The student missionaries are selected by the Summer Mission Board of the state BSU, which is composed of student representatives from dif-

ferent campuses. They are officially approved at a general meeting by the state BSU. This is the first time a student has been selected from the MSM campus.

Eldon will serve as the preacher on a revival team that will work in Missouri and Illinois. He will be working with Charles Anderson from Southwest Baptist College. They will work in Vacation Bible Schools, do camp work and hold revivals.

Change, not habit, is what gets most of us down; habit is the stabilizer of human society, change accounts for its progress.

there's a great future with

EMERSON ELECTRIC

... MAKE YOUR PLANS NOW

Acquisition of still more new project contracts has added even greater impetus to our long-range expansion program. It's still not too late to investigate career opportunities at Emerson Electric.

As an Emerson engineer you'll enjoy the prestige of being with one of America's fastest-growing established companies. Emerson's growth means there's plenty of opportunity for your professional growth . . . and because Emerson is medium-size, you'll work on many intriguing projects with top level engineers from the very beginning. Your personal creative contributions will be recognized with rapid advancement and further opportunities to broaden and diversify your experience.

Other immediate rewards at Emerson are an excellent salary, an outstanding profit-sharing plan, group insurance and pension plan, an educational program on graduate levels, plus many more extra benefits.

Emerson Electric is a medium-size company with 6000 employees, 900 engineers. Our Commercial Division, established in 1890, produces a complete line of fans, motors, air conditioners, heaters, welders and power tools. Since 1940, our Electronics and Avionics Division has projected Emerson Electric as a national leader in the design, development and manufacture of electronics and avionics products. This perfect balance of consumer, electronics and avionics production assures stability, opportunity and security in your career at Emerson Electric.

Write immediately to Bryon Johnston, sending your college information sheet.

## Edward Sowers New Member Of Pi Kappa Alpha Chapter

On Sunday, April 26, Mr. Edward W. Sowers was initiated into Alpha-Kappa chapter of the Pi Kappa Alpha Fraternity. Mr. Sowers is a graduate of the University of Missouri School of Journalism. He is publisher of the Rolla Daily News and is very active in church and civic affairs in Rolla. The chapter was honored to have Charles L. Freeman, National Treasurer of the fraternity and Richard N. Bills, District President, present in Rolla for the ceremony.

### Beta Sigma's Boxer "Duke" Is Missing

Oh great warrior, Walter Schriber, has returned to this area after a nine week vacation at Fort Belvoir, Virginia. He surely loves Army life, at least the part of it around Washington D. C. Life at Fort Wood should be a typical drag in comparison. Glad to have you back around for awhile Wal-ly.

As the old saying goes, no news is good news, is almost the case here at Beta Sig except for one thing. It has been two days since we have seen or heard from our dog. If anyone sees a boxer, dead or alive, who answers to "Duke", please relieve our curiosity and tell us.

There is nothing so distressing as talking to someone who has returned from St. Louis and is unhappy. It's catching, Dave, so you should always be happy. Especially since you have so often avowed your love and devotion to Rolla. "Yessir, I'm happy here!" Anyway, we all depend on you to lift our morale when you return,

Following the initiation, the chapter, Mr. Freeman, Mr. Bills, and Mr. Sowers attended a tea at the home of Dr. Daniel S. Eppelsheimer. The tea has been an annual affair and is always looked forward to by the men of the chapter. We would like to thank Dr. and Mrs. Eppelsheimer for the invitation and the warm hospitality which we received.

so try to put on your pleasant face.

Nothing like a "back to the soil" movement, huh Schmelig? Too bad we all can't bathe in the Little Piney but after all, it is a bit cool. May I see your Polar Bear Club membership card, mister?

### Sig Pi Lucks Out in Game With Tech Club

In Spring a young man's fancy likely turns to thoughts of love, but Art Jacobsmeyer did one better. He thought of marriage. No date has been set for the marriage, but if I know "Jake" it will be soon.

It was getting to look pretty blue in our baseball game against the Tech Club, but in the fifth inning we let loose a rally of eleven runs and beat them by a score of 20 to 19. This game was a real thriller.

To polish off a hectic few days of E. I. T. exams, we had an outing with the Tekes at Lions Park Saturday. Actually this was a pretense to throw Grossenbacher, a graduating senior, into the pond. "Gross" put up a good fight, but in the end he succumbed to the

force of some work and a lot of sweat.

### TKE's Measure Days Until School Is Out

Well, there are only four more weeks until school is out, and two more weeks until Greek Day. It won't be long now.

Last Saturday we got together with Sigma Pi for a beer bust out at Lions Park. It was a darn good party, some people went in the lake, some played softball, some just drank and some were entertained by friends of Richard Fox. Anyone for a car ride?

Also last weekend, the pledges took off on skip night. They wouldn't say where they went, but from the way they sounded it was awful cold out. They did come back in time for the beer Saturday night.

### Delta Sig an Empty House Last Weekend

Spring must be here, or at least the spring fever is. The few men that stayed in Rolla this weekend were around the house for meals and that was about all.

Several brothers went to a conclave on rushing procedure this weekend. Most of the chapters in this region were represented. We hope the points brought out in the discussion will be beneficial to the chapter.

It seems fencing is becoming a popular sport here. I'm for it, but I wish we would get stronger fencers or thinner mattresses.

### AICHe on Group Tour Of St. Louis Plant

Twenty members of the Student Chapter of the American Institute of Chemical Engineers visited the Proctor and Gamble Plant in St. Louis on April 21, 19-

59. After eating lunch in the plant cafeteria, the group was led on a good tour of the plant. The tour included the soap and detergent processes from raw materials to the packaging of the many products.

That evening the group attended the meeting of the St. Louis

Professional Chapter of AICHe. Following dinner, Dr. Glenn C. Williams of the Massachusetts Institute of Technology spoke on "Analysis of Highly Exothermic Processes by Simplified Kinetics."

Dull men and dull women seem to have all the fun.

## Do You Think for Yourself? (TAKE THIS FAST QUIZ AND FIND OUT!\*)

1. Which would you consider more essential to a happy marriage: (A) the mates' similarity in ages and backgrounds, or (B) their intelligence and adaptability?

A ☐ B ☐

2. Which of these two famous men would you most prefer to be like: (A) King Midas, or (B) Ludwig van Beethoven?

A ☐ B ☐

3. If neither party's candidate in an election was satisfactory to you, would you (A) not vote, or (B) vote for the "lesser of two evils"?

A ☐ B ☐

4. If your performance in a group effort was being unjustly criticized, would you (A) settle the score directly with your critic, or (B) ignore it and let the group decide its merits?

A ☐ B ☐

5. Do you believe that the meeting with your future mate is primarily a matter of (A) geography, or (B) fate?

A ☐ B ☐

6. If you were to come unexpectedly into a sizable sum of money, would you (A) bank or invest it and spend only the income, or (B) take a year off to travel around the world?

A ☐ B ☐

7. Do you think the saying "It never rains, but it pours" is (A) generally untrue, or (B) invariably true?

A ☐ B ☐

8. Would you rather invest money in: (A) great art, or (B) diamonds?

A ☐ B ☐

9. Are you influenced more in your choice of filter cigarette by (A) your own taste and judgment, or (B) friendly advice?

A ☐ B ☐

Next time you light up, take a moment to think about what you really want in your filter cigarette. Most men and women who think for themselves choose VICEROY... for the very sound reason that it's the one cigarette with a thinking man's filter and a smoking man's taste.

\*If you checked (B) on three out of the first four questions, and (A) on four out of the last five, you really think for yourself!

© 1959, Brown & Williamson Tobacco Corp.

Familiar pack or crush-proof box.

**The Man Who Thinks for Himself Knows—** ONLY VICEROY HAS A THINKING MAN'S FILTER... A SMOKING MAN'S TASTE!

Front row, left to right: Dave Stallschmidt, Jan Coester and Wayne Siesennon. Back row, Paul Sisk, Rich Hampe, Ken Schmidt, Jerry Helgeson, Ray Morgan, Geology Department, Coach.

## Racquet Squad

by Jerry Luccke

If a visitor on the M.S.M. campus were to ask the average Miner how the tennis team was faring this spring, he would probably receive a quizzical shrug and a confused grin. From this you can readily see, varsity tennis does not receive much attention on campus. Tennis, however, is a demanding game which requires long hours of practice and years of experience before one can become truly adept.

College tennis is a strange game in the sense that individual performance is very important. Much like a boxer or a wrestler, the tennis player is alone with his opponent and has no team-mates to pull him through if he gets into a jam. Because of this, a good coach is of prime importance. The Miners are indeed fortunate to have a capable and qualified coach in the person of Ray Morgan. Mr. Morgan's first job here at M.S.M. is to teach geology, with the job as tennis coach taking a close second especially in the spring of the year. Ray has been mentor of the tennis team since 1948, and tells an interesting story of how he came into the job.

It seems one day after class some of his students who were members of the tennis team brought up the subject of tennis to him and asked him if he played. He replied that he had played some tournament tennis, and was promptly invited to practice that night. Ray proceeded to cut up the team members in play, and the impressed students took the matter to the Dean after which Ray was duly installed as coach. Even today at age 51, when most men confine their physical activity to the bridge table, Ray plays

a tough game of tennis though he readily admits that he is slowing down.

Though the Miners have yet to win a conference crown in tennis, this year may be the one for the Miners. Coach Morgan expresses the usual coaching pessimism when queried on this point, but the continued improvement of Jan Coester coupled with the steady play of Dave Stallschmidt and Rich Hampe might mean conference laurels for the Miners this year.

The first three slots on the team are held by Jan Coester, Dave Stallschmidt, and Rich Hampe. The remaining three positions are usually a toss up between Wayne Siesennon, Paul Sisk, Ken Schmidt, and Jerry Helgeson.

Sophomore Jan Coester, the Miner number one man, has been playing fine tennis this spring. Earlier in the season, Jan was losing a lot of points on double faults but has since corrected this and has become very effective. Number two man, freshman Dave Stallschmidt, though still relatively new to college tennis, has done a fine job this spring and much is expected from him in years to come. Junior Rich Hampe doesn't overpower anyone with tremendous shots, but plays a cool steady game for the Miners.

On these three men bear largely whether or not the season will be a success or failure.

### NOTICE

ALL SENIOR LETTERMEN SEE NICK BARRE IN THE ATHLETIC OFFICE SOMETIME BEFORE MAY 5, 1959.

Very Important.

## Intramural Sports

The intramural tennis doubles tournament has ended with Woodward and Swoboda of Sigma Phi Epsilon coming out on top of the heap. Gunther and Benz of Theta Kap were the runners-up. The results and the intramural points turned out as follows:

1	Sigma Phi Epsilon	150.0
2	Theta Kappa Phi	137.5
3	Dorm	125.0
4	Kappa Sigma	112.5
5-6	Lambda Chi Alpha	93.7

## Housman Only Bright Spot As Salukis Outclass Miners

by Tom Dunn

Being able to gain only three first places, five second places, and 36 points in the Southern Illinois University meet held here Friday, April 14, the Miners were unable to overcome an overpowering Southern Illinois University team. The Miners' Houseman led the field in individual accomplishments as he totaled 13 points with first places in the 220 yard dash and the broad jump, and a second place in the 100 yard dash. He clocked in at 22.8 in the 220 and jumped 21' 6" in the broad jump. The only other Miner to capture a first was Gay with a 134' throw of the discus. Vancil was held to two second places behind fleet-footed Southern Illinois University's Flamer in the mile and two-mile event. Both of Flamer's times were under the MSM school records.

Irwin for the Miners was successful in gaining six points with a second place tie in the pole vault, second place in the 880-yard run, and a third in the high

jump.

High scorers for Southern Illinois University were: Flamer, who turned in a 10-point total from his mile and two-mile efforts; Helberg close on his tail as he aggregated 9½ points in the 440, 220, and the mile relay. The SIU mile relay team outdistanced the Miners with a good time of 3:29.6.

This 92-36 loss brought the Miners' season record to two wins and three losses.

After the Westminster meet, which was scheduled last Wednesday, the Miner cinder men have one more event scheduled for this season, the conference outdoor meet to be held at Rolla on Friday and Saturday, May 8 and 9. See next week's issue for complete details.

The top five scorers:

Houseman	MSM	13
Flamer	SIU	10
Helberg	SIU	9½
Windler	SIU	8
Shannon	SIU	8

Pi Kappa Alpha	25.0
16-20 Theta Xi	6.5
Kappa Alpha	6.5
Beta Sigma Psi	6.5
Triangle	6.5
Shamrock	6.5

The finals in the horseshoe doubles and singles will be played off this weekend and possibly part of next. In the singles the Tech Club has taken the winners' side of the double elimination tournament. Pi Kappa Alpha and the Engine Club will play off the loser's side and the winner will in turn play the Tech Club.

The Tech Club also won the winner's side of the doubles. Kappa Sig took the loser's side and these two teams will have their playoff this week. Should Kappa Sig top the Tech Club, a second playoff will be necessary.

The intramural golf tournament will be held Saturday, May 2, and Sunday, May 3. Starting times are 1 p. m. Saturday, and 8 a. m. Sunday. The tournament will start at tee No. 1, which is west of the golf shop and across from Phelps County Hospital. Each organization may enter a two man team and must have their entries turned in by April 30.

Preliminaries in the intramural track will be held Tuesday, May 12, at 4:30 p. m. The finals will be held Thursday, May 14, starting at the same time. Each organization may enter no more than two men in an event and no contestant can compete in more than two events plus a relay. Check bulletin board later on for schedule of preliminary races.

## The new Arrow FREE-WAY puts "action" in a shirt . . .

Here's a knitted shirt just made for active sports (and lounging around, as well). The feather-light, mesh-knit fabric is bias-cut for perfect freedom in any position. The back, cut longer than the front, lets the collar fit your neck just right. In a variety of shades to match or coordinate with your summer sportswear. \$4.00.

# THINKLISH

## English: HILLTOP HASH HOUSE

**Thinklish translation:** This diner is perched on a mountain peak, which makes it a *crestaurant!* The view is tops—but from there on, things go downhill. A typical meal includes a puny melon (*scantaloupe*) and your choice of sandwiches (*shamburgers* or *rankfurters*). It's all served up, naturally, on 50-yr.-old dishes (*crackery*). Best course to take: light up a Lucky . . . enjoy the honest taste of fine tobacco. There's no tip at the end!

## English: FEATHERED MUSICAL GROUP

Thinklish: **STORKESTRA**

ALLAN BISHOP, NORTHWESTERN U.

## English: HAG'S TIMEPIECE

Thinklish: **WITCHWATCH**

DONALD MACPHERSON, N. Y. U.

## English: AVERSION TO COOKING

Thinklish: **PANIMOSITY**

KITTY KELLEY, U. OF MARYLAND

## English: BUBBLE-GUM EXPERT

Thinklish: **CHOMPION**

ALBERT ALSCHULER, HARVARD

## HOW TO MAKE \$25

Take a word—*amplifier*, for example. With it, you can make a wet microphone (*dampifier*), a torch singer's mike (*vamplifier*), a boxing-ring loudspeaker (*champlifier*) or a P.A. system in an army post (*campifier*). That's Thinklish—and it's that easy! We're paying \$25 for the Thinklish words judged best—your check is itching to go! Send your words to Lucky Strike, Box 67A, Mt. Vernon, New York. Enclose your name, address, college or university and class.
